2023 Camp Hemotion COVID-19 Guidelines-Updated April 3rd, 2023

Introduction: The following COVID-19 guidelines have been recently updated accordingly to match the current CDC and California Department of Health guidelines. You will notice that the vaccination requirements are different from the requirements stated in the vaccination section in camp docs. We apologize for any inconvenience this has created. We do ask that you still load any COVID-19 vaccination in camp docs. Thank you!

COVID Vaccinations: As per recent CDC guidelines and the California Department of Public Health, COVID-19 vaccines are no longer required for campers or staff to have in order to come to camp but may be a required vaccine in the future, as one of the required school vaccines, needed for K-12 students. It is strongly recommended that everyone coming to camp gets fully vaccinated (2 primary + updated booster).

Masking: Masking is no longer required for indoor settings, including healthcare settings (camp infirmary) as of April 3rd, 2023, but is encouraged while indoors while at camp.

Testing/Screening: Camp Hemotion medical personnel will be performing a one-time COVID-19 nasal swab/ symptom check/temperature check at the bus stops prior to boarding. If your child tests positive or has any associated symptoms, he/she will not be allowed to board the bus. Please remain present at the bus stop until your child's COVID-19 test has been resulted and he/she has been cleared to board the bus.

If your child has tested positive prior to the first day of camp, he/she must have 5 days without any symptoms in order to go to camp.

If your child has been exposed to someone who tested positive for COVID-19 and has no symptoms, he/she must have proof of a negative test 3-5 days after last exposure.

The following are COVID-19 associated symptoms: fever, cough, shortness of breath, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, and diarrhea.

******If your child tests positive for COVID-19 while at camp, universal and isolation precaution protocols will be followed per CDC and California Department of Public Health standard recommendations.. A parent/guardian or child's designated emergency contact will be responsible for picking up the child at Camp Oakhurst.**
